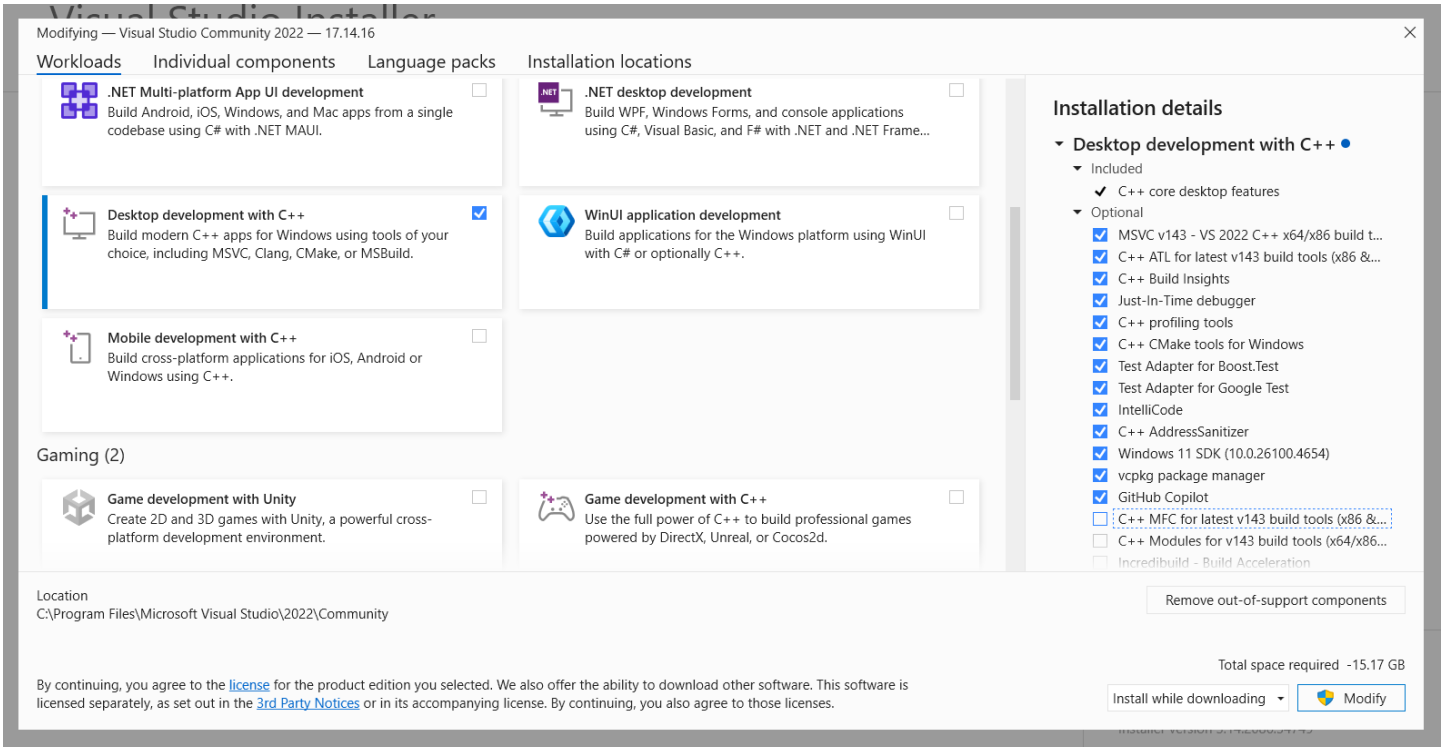
# Manuál k inštalácii a spusteniu

## 1. Inštalácia VS Build Tools

1. Stiahnite si VS Build tools „VisualStudioSetup.exe“ z linku: https://visualstudio.microsoft.com/cs/downloads/?q=build+tools
2. Označte podľa obrázka



## 2. Stiahnite si NOVÉ repo

1. Z https://github.com/dekdekan/demoRMR-all branchu **DEMO_RMR_NO_LIB**

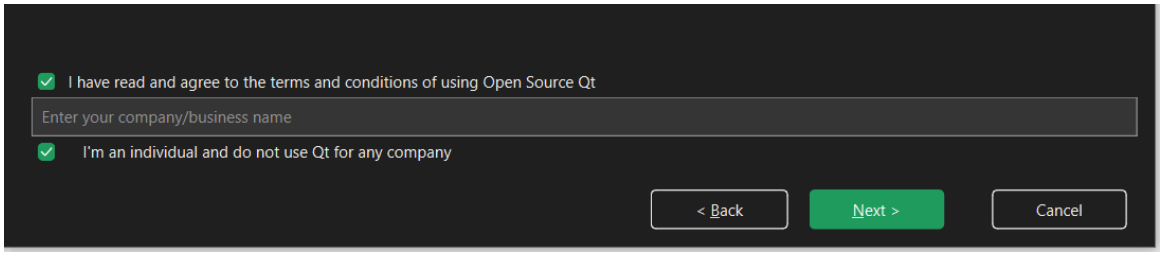
## 3. Stiahnite si instalater na librobot knižnicu z linku

https://github.com/dekdekan/librobot_RMR/releases/tag/v1.0.0

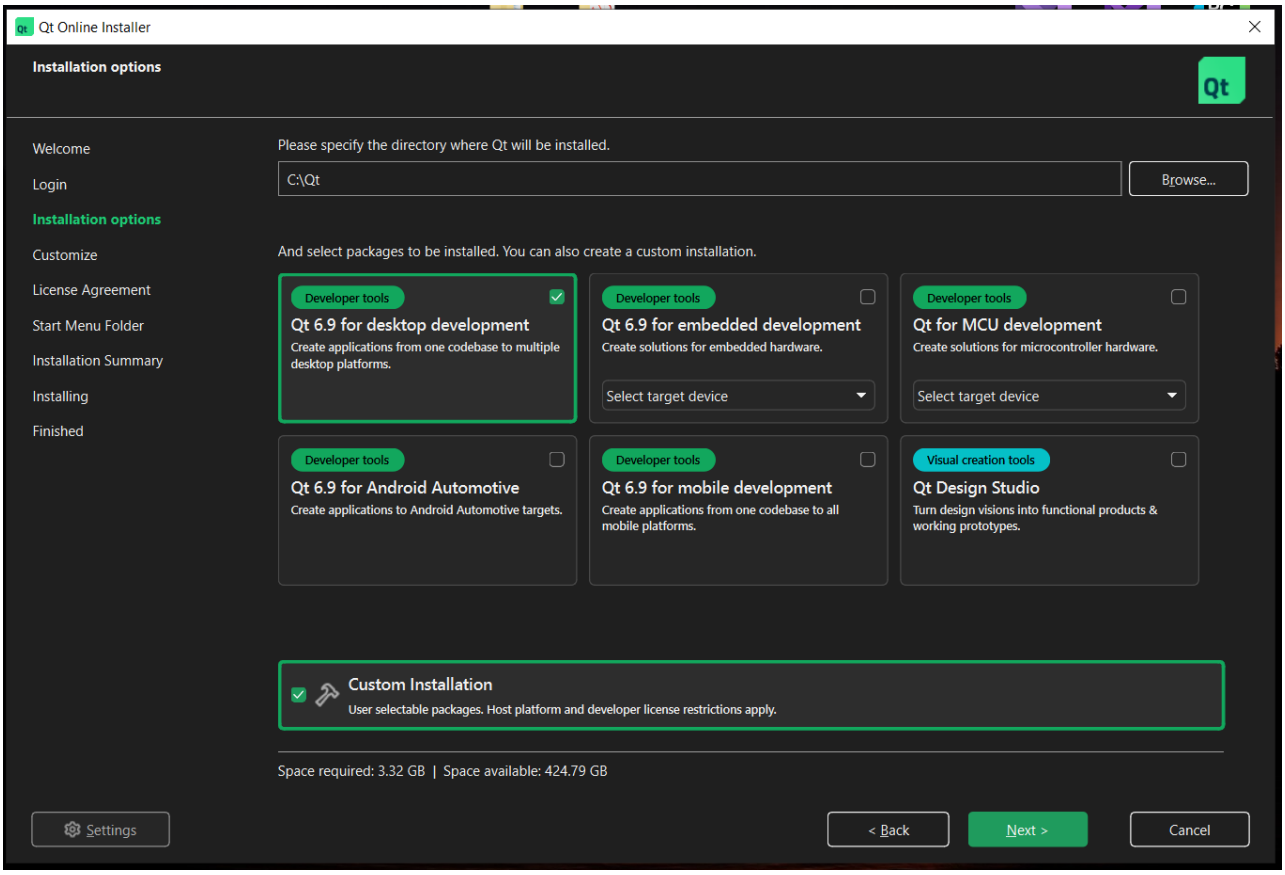
A nainstalujte si ju na svoj počítač

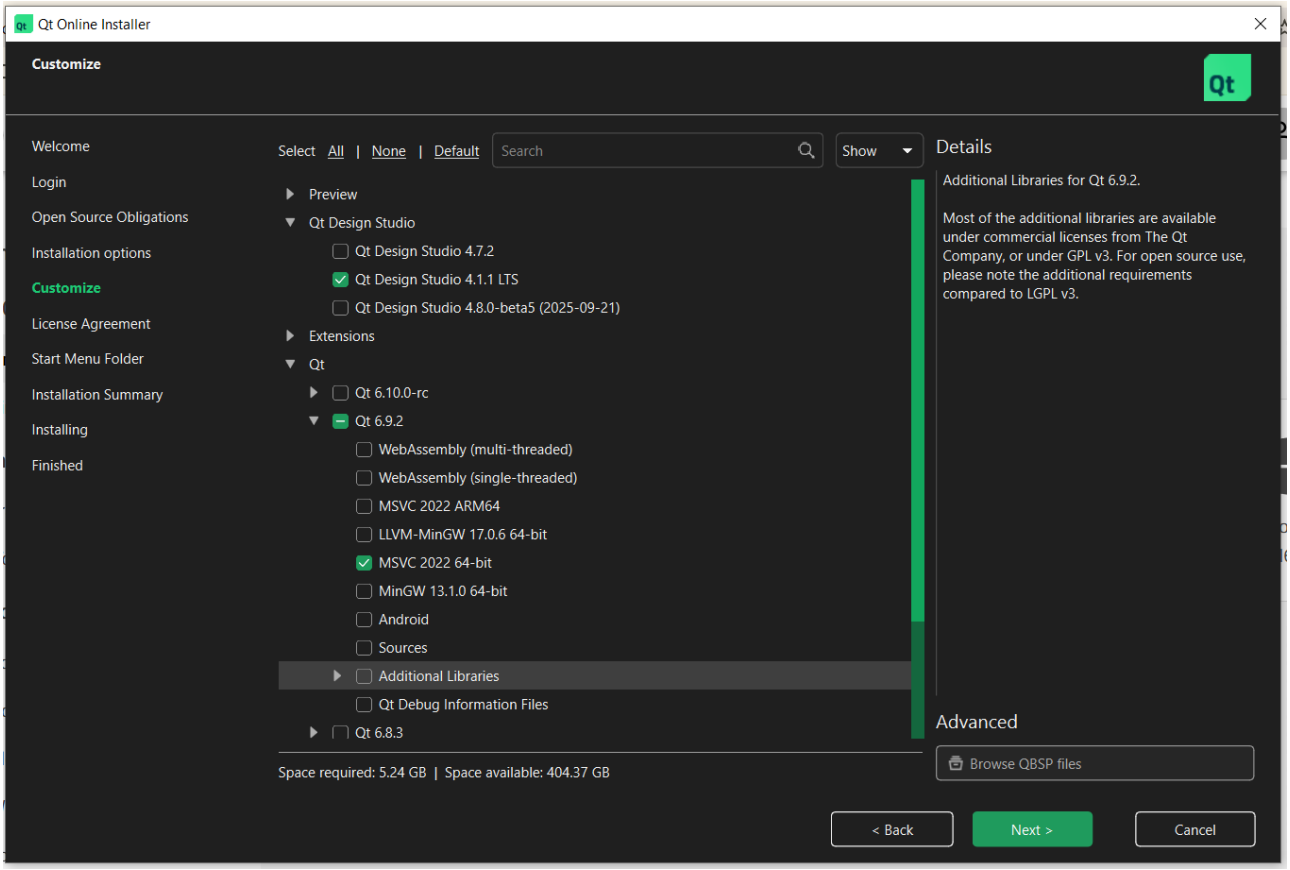
## 4. Inštalácia Qt IDE

1. Stiahnite **Qt Online Installer** z linku:
   - https://www.qt.io/download-qt-installer?hsCtaTracking=99d9dd4f-5681-48d2-b096-470725510d34%7C074ddad0-fdef-4e53-8aa8-5e8a876d6ab4
2. Spustíte inštalačný súbor
3. Prihlásite sa do Qt konta/ Vytvoríte si nové -> Next
4. Potrvdíte -> Next



5. Setup – Qt -> Next
6. Contribute to Qt Development -> Disable .... -> Next
7. Installation Folder -> C:\Qt
    - Custom Installation -> Next





8. Additional Libraries

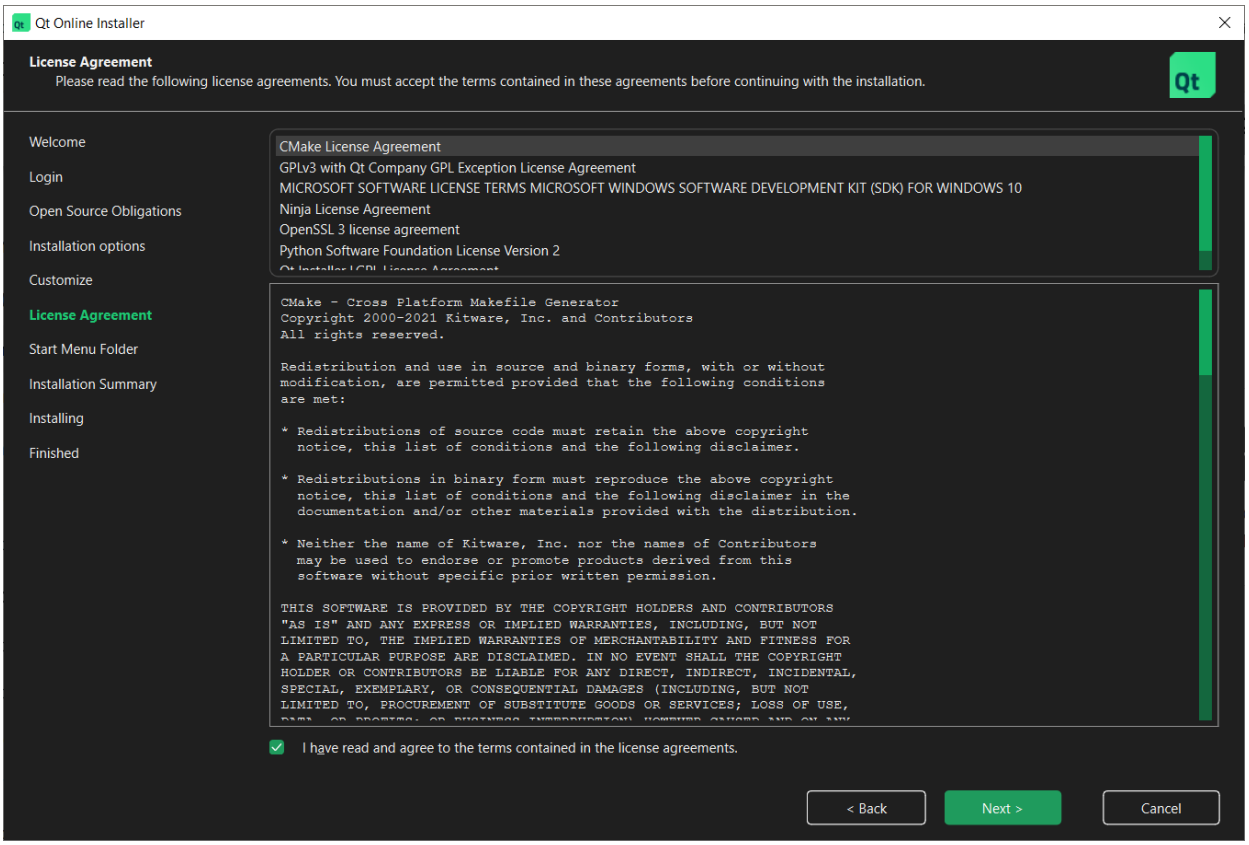
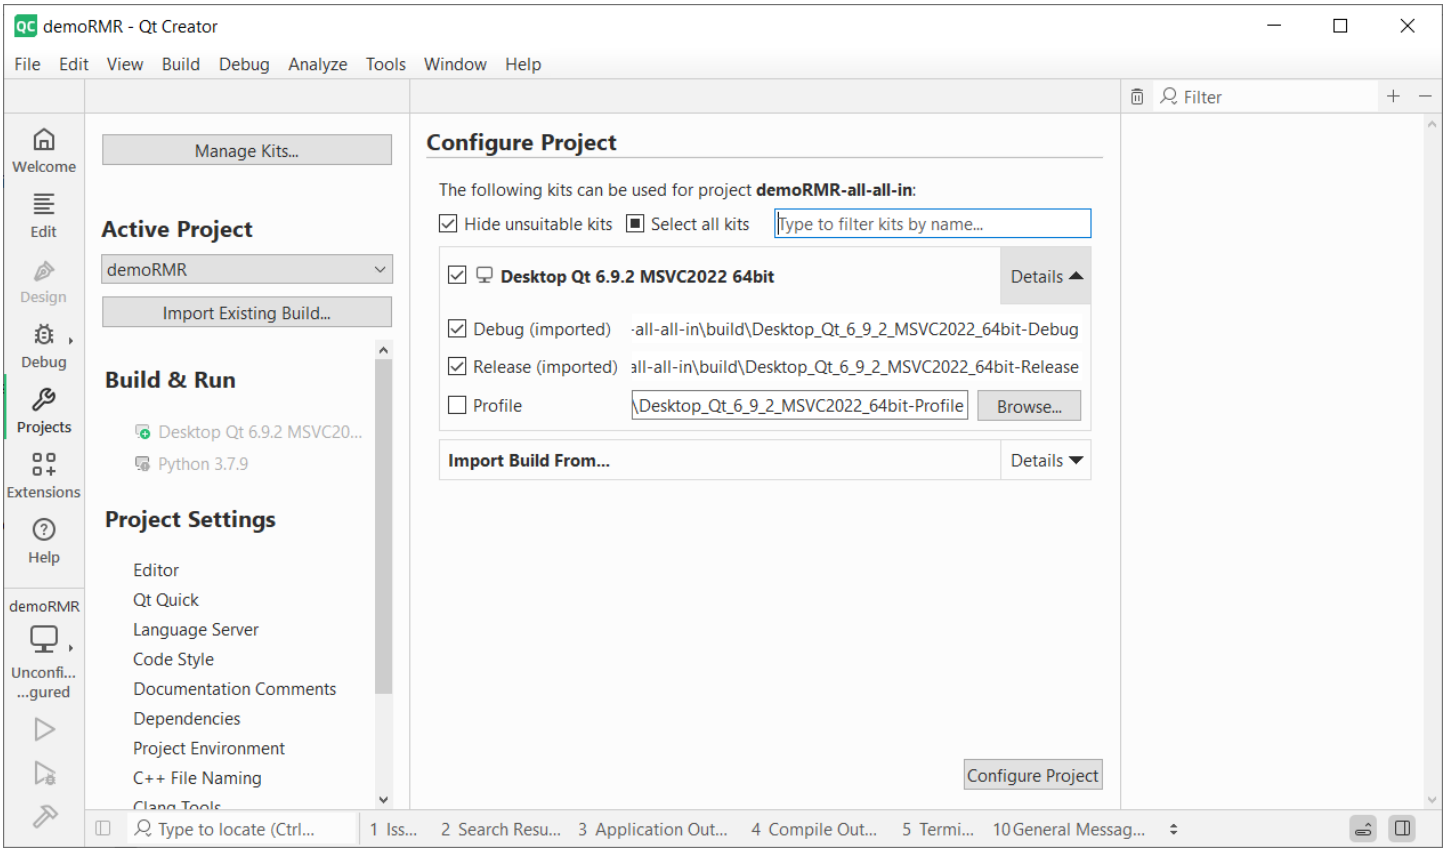
11. License Agreement



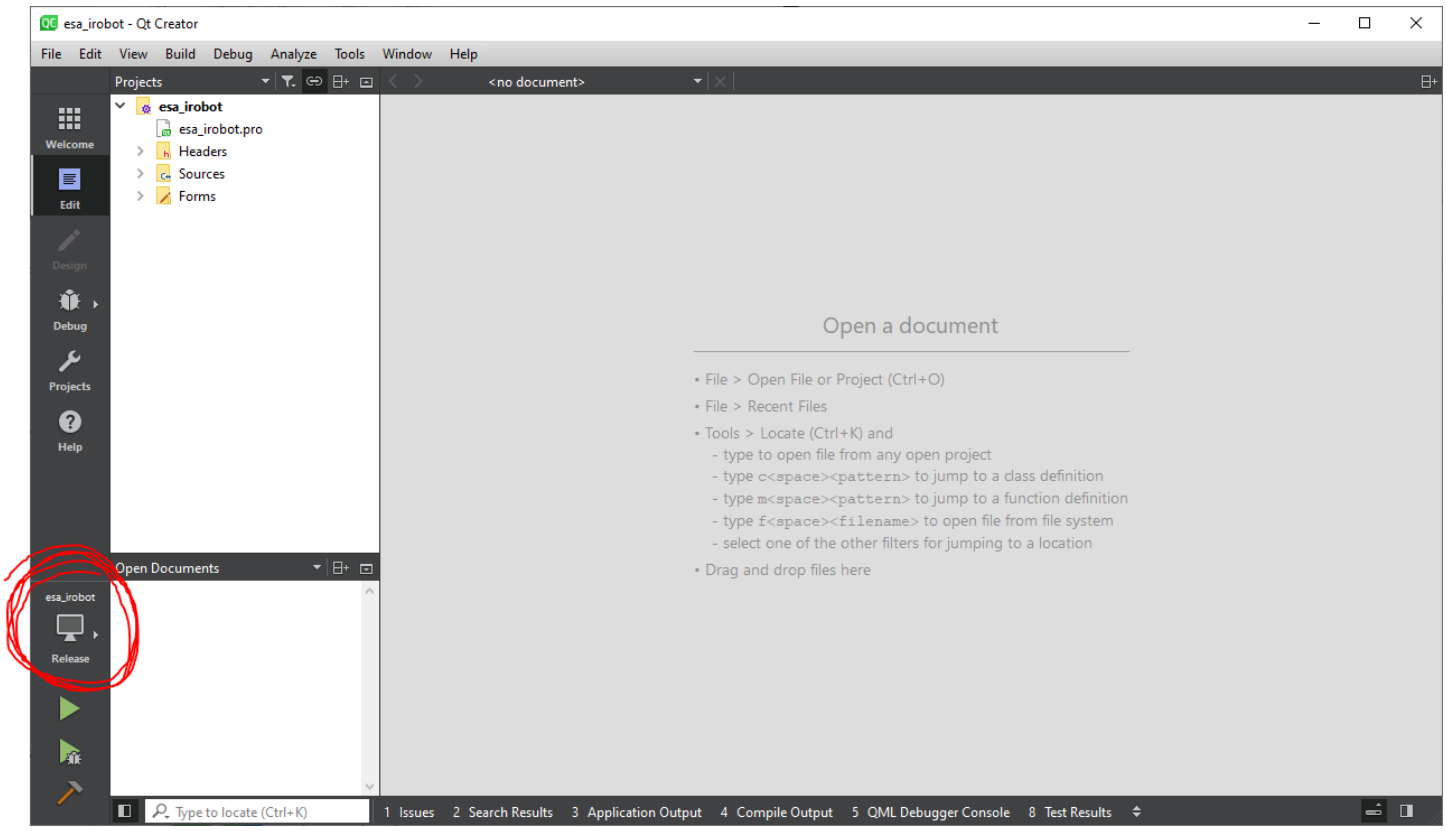
12. Start Menu shortcuts -> Next
13. Ready to install -> Install
14. Finished -> Nemusíte nič spúšťať -> **Finish**

## 5. Načítanie do Qt

1. Priečinok **demoRMR** obsahuje projektový súbor **demoRMR.pro**, ktorý buď načítate do Qt dvojklikom alebo spustíte už nainštalovaný Qt Creator kde cez **File -> Open File or Project** načítate súbor **demoRMR.pro**
2. Následne by sa vám v Qt Creatore mala objaviť nasledujúca obrazovka. Kliknete na **Configure Project**



3. Prepnete Qt Creator do **Release** módu



4. Spustíte **Build (symbol „Kladivo“)** projektu, ktorý by mal byť úspešný

## 6. Spustenie

**Pri spustení je dôležité dodržať nasledujúci poradie:**

1. Spustiť **kobukiSIM.exe alebo reálny robot**
2. Spustiť **DemoRMR** cez **Qt**
